Senior engineer with 15+ years of experience building full-stack web applications. Designs AI agents, browser automation and SaaS platforms across insurance, digital signage and tourism. Combines hands-on development with system architecture, engineering leadership and production operations.

Technical Skills

AI and automation: RAG, context and prompt engineering, AI agents and workflow orchestration, tool/function calling, structured outputs, Model Context Protocol (MCP), LangGraph, LangChain, Mastra, browser automation (Playwright), LLM evaluation and observability, AI-assisted development.

Development: TypeScript, JavaScript, Python, PHP, SQL, HTML, CSS; Laravel, Node.js, Vue.js, Nuxt.js, React, [Next.js](#), FastAPI, Fastify, Express

Data and delivery: MySQL, MongoDB, Redis, BullMQ, microservices, API integrations, Git, deployment, monitoring

Familiar with: Cloud, Docker ve CI/CD

Professional Experience

Software Architect / Project Manager

VortexAI | Turkey | Jun 2024 - Jul 2026

- Led architecture and engineering delivery of an AI-powered SaaS platform for insurance quoting and sales, using a Laravel API, relational database and Node.js microservices.
- Built Playwright browser servers and AI agents to retrieve quotes from insurer portals, with BullMQ/Redis queues and multi-process workers; managed CPU, memory and proxies.
- Developed a WhatsApp AI agent for customer communication and automated background integration health checks.
- Led planning, code reviews and production operations, including deployment, monitoring and incident response.

Senior Full-Stack Web Developer

BeScreen | Turkey | Jun 2022 - Jul 2024

- Built a digital signage SaaS platform with an integrated design editor, Vue 3 dashboard, Laravel backend and Node.js microservices, reducing customer onboarding time by 25%.
- Implemented a WhatsApp AI agent for screen management, reducing customer support requests by 35%; improved API integrations and code quality through reviews.

Senior Full-Stack Web Developer

LikyaPix | Turkey | Jun 2015 - Jun 2022

- Led development of tourism and villa rental platforms with Vue.js, Nuxt.js SSR and Laravel, improving load times by 40% and increasing booking rates by 20%.
- Optimized databases and queries to improve page response times by approximately 50%.
- Introduced Git-based team workflows that reduced deployment errors by 30%; integrated payment, booking and mapping APIs.
